

monarch butterfly workshop

JOIN US AT LADEW GARDENS FOR AN INCREDIBLE JOURNEY

Each fall, monarch butterflies from the U.S. and Canada begin a 2,000 mile migration to Mexico. The following spring, their great grandchildren return. This summer, an exciting opportunity for teachers and butterfly enthusiasts is coming to Maryland. Whether you're a classroom teacher, naturalist, gardener or simply a lover of butterflies, "Teaching and Learning with Monarch Butterflies" will help you gain knowledge, skills, and confidence in raising monarch caterpillars and butterflies. This two-day workshop will provide a meaningful, hands-on learning experience with an interdisciplinary approach of combining science, gardening, art, geography, literacy, math, technology, Mexican culture and more.

(For more info, visit <http://monarchteachernetwork.info/>)

monarch butterfly workshop

Participants do not have to be formal teachers. The general public and monarch enthusiasts are welcome to attend.

Each participant receives: A curriculum guide with almost 100 activities and Monarch life cycle/rearing information; butterfly and caterpillar rearing cages; books; posters; DVDs; Strategies for butterfly gardens and “Monarch Parades”; Inquiry-based science activities for all abilities; Activities for Mexican/ pre-Hispanic culture, history and Spanish language; Activities for language arts, math, social studies, drama, and fine arts; Distance learning projects with schools in Canada/Mexico/California; Proven models for engaging community support; Post-workshop on-going support.

The powerful story of the monarch butterfly inspired the emergence of the Monarch Teacher Network (MTN) in 2001 and its Canadian partners in 2003. MTN is made of veteran teachers (teaching children of varied ages and abilities), non-traditional educators, master gardeners, naturalists, park workers, or anyone who has a passion for the monarch butterfly story and teaching. They share information and resources with each other and can apply for fellowships to visit the monarch sanctuaries in Mexico or California.

What people are saying:

- “This was the most awesome learning experience in my 30 years of teaching.”
- “Thank you for all the insights—reflecting on our way of life and how to make a difference.”
- “Everyone’s commitment, dedication, energy and obvious passion for this project are outstanding and contagious ... wonderful ambassadors for the planet Earth!”
- “What a magical place the classroom will be! I can’t wait to try to connect kids even more to the environment.”
- “I have never had monarchs in my classroom and now I am excited to start this new amazing classroom activity! I feel fully equipped to start this new hands-on adventure!”
